Burlington

NORTH CAROLINA . . .

A good place in which to live, play and do business

Burlington's residential section, made up of modern homes as well as mansions, is noticeable for the warmth and charm of the city. Spacious grounds, plenty of fresh air and sunlight, relief from fogs, flowers and vegetables make living present and hereafter in this Burlington area. Nature has been kind to Burlington. A mean temperature of 61.8 degrees and a rainfall of 38.2 inches, good drainage and fertile soil make gardening and flower growing easy. This majority of Burlington citizens are home owners. How ever, comfortable and modern apartments are available for those desiring such accommodations. During the decade from 1940-50 the City of Burlington more than doubled its population and one of the principal reasons for home building in this next ten years is because the population is doubling again.

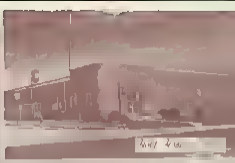
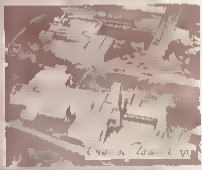
Burlington is a modern city, complete in every respect, and with room to grow. Its streets are broad, well lighted and clean. City laundry and funeral buildings are modern in all respects. Hotels are modern and ample for Burlington's needs.

The water supply provided by the Burlington reservoir will supply a city many times the size of Burlington. The capacity of the present modern filtering plant is five million half million gallons per day, a million gallons more than Burlington has ever used in any one day.

The New Memorial Library is one of the several public buildings of which Burlington citizens are extremely proud. The library through recently found room for its 35,294 volumes





Burlington is outstanding as an industrial center. More than 18,000 people (1951) in the Burlington area are engaged in manufacturing. The majority of these work in hosiery plants, while about one third work in woolen and the remainder in the manufacture of electronic equipment, furniture and a variety of other products. The payroll for the Burlington area during 1950 exceeded $30,000,000 and the average income per family was approximately $5,000. This is an indication of the high level of living in Burlington. Though Burlington is one of the largest industrial centers of North Carolina, it has many suitable residential areas.

Ample electricity is furnished by Duke Power Company and natural gas will be provided by Piedmont Natural Gas Corporation. There are good water facilities and the city is served by the Southern Railway and an abundance for a city the size of Burlington. Postal service is excellent. The location of successful plants in Burlington has been through expansion of its local industry, and the influx of new industrial enterprises. Industry is welcomed from any suitable industry desiring to locate in the Piedmont section of North Carolina.

Scenes at Elon College

Elon College is located four miles west of Burlington and has a normal student body of approximately 800 and a standard grade A college. Elon College has been serving the Southern Conference, which begins in the Building and area of more than 60 years. More and more Building is being the voice of this institution which guides the young men and women in moral and character and college or day students

Burlington and Alamance County are proud of the schools. Over a period of years the school of choice have been working toward a definite goal. Today each child has the very best in equipment and the finest qualified teachers and in every respect opportunity for development for the young men and women. This goal has in many ways been reached, and the new building program which provides modern and efficient high schools for Burlington along with other facilities and additional classrooms for our county schools assures us of the education which we want continue to offer our young people.

Burlington has seven public schools including one senior high school and one junior high. There are also a business college a parochial school several private kindergartens and suburban Elon College.

Agricultural Scenes

Agriculture now rivals the big business in Anderson County. While the growing of cotton has made Anderson famous during the past decade, the growing of tobacco now is coming

Records of the County Agent show that 244,954 acres of land are in farms. Of this total 30,772,970 acres are in cultivation. The principal farm crops and the acreage devoted to each are: cotton, 57,970 acres; corn, 40,000 acres; and hay crops, 128,000 acres. The planted acreage of the following crops during the past year is estimated on the basis of reports received during the year. There were 19,207 acres in the county devoted to pasture and during 1940 the 77,970 acres in cultivation were planted in the following crops: cotton, 39,000 acres; corn, 27,000 acres; hay crops, and the remaining acres in various crops.
